

I am writing to encourage the FCC to not implement any proposal that would lessen Indiana's Telephone Privacy Law protections. My time spent at home has not been constantly interrupted with unwanted phone calls or computer dialed phone calls. I work nights and I used to receive 5-10 phone calls a day. It has been wonderful to be able to sleep uninterrupted. I do not feel I have missed any phone calls that I would have wanted. I feel I have the right to not be interrupted during my work, sleep, or family time by phone calls.  
Thank you.
